

# Hei-VAP Expert / Ultimate

With a clear 5" or 7" touch display

With the Hei-VAP Expert, all values are always in view.

Rotation speed and heating bath temperature can be set exactly on the digital touch display or – for fast access during the process – directly via the rotary controller on the control panel.

- Central control panel with a 5" touch display
- Clear display of all valves (Basic and Advanced modes)
- With timer, limiting of the heating temperature, multilingual menu and text display of error messages
- Separate rotary controller for rotation and heating temperature with lock function against accidental adjustment
- LED rings and pictogram for display of the activity, including from a distance
- Integrated solvent library for facilitating setting of the optimal rotation speed and heating bath temperature, including indication of the necessary vacuum
- USB and Micro-SD interfaces
- All process data can be stored and transferred via a USB stick
- Optional boiling temperature display

Subsequent upgrade to Hei-VAP Expert Control / Ultimate Control possible with vacuum and cooler control.

See pages 20 – 21

Hei-VAP Ultimate differs from the Hei-VAP Expert due to:

- 7" touch display – so that all values are always in view, even from a larger distance
- LAN / RS 232 interfaces
